SUMMARY

I am an Informatics student at Ciputra University (Makassar Campus) with a strong passion for Data Science and AI. Most of my university years have been spent building mobile and web apps using Flutter, Laravel, and MySQL, while also publishing research on AI-based tomato leaf disease detection with CNN and OpenCV. My interest in AI actually started before university, sparked by the rise of generative AI and how fast the field was moving. That curiosity grew deeper when I discovered capital markets and the potential of building systems that can read data and make decisions autonomously. That is the direction I want to go, with a long-term goal of building my own fintech company. I am looking for an internship in Data Analytics, Data Science, or AI from July to December 2026.

EDUCATION

Bachelor of Informatics (Specializing in Artificial Intelligence) 2023 - Present
Ciputra University (PSDKU Makassar Campus)

- CGPA: 3.89, Relevant Courses: REST API, Mobile App Development, Database Design, Big Data, Machine Learning, Computer Vision

RESEARCH & PUBLICATIONS

Automatic Identification of Tomato Leaf Conditions Based on OpenCV and CNN Des 2025
INTRO: Journal Informatika dan Teknik Elektro, Vol. 4 No. 2, pp. 112–118

- Built an AI system classifying tomato leaves into 9 categories (1 healthy + 8 disease classes) using CNN integrated with OpenCV.
- Achieved ~90% accuracy with precision, recall, and F1-score all above 0.88 on the test set.
- Implemented real-time detection via camera with average prediction time under 1 second per image.
- Pipeline included image preprocessing (resizing, normalization, augmentation), Adam optimizer, and categorical cross-entropy loss.

PROJECTS

PilihPilih | Imperfect Food Marketplace App 2026
Back-End Developer & Database Designer | Laravel 13, MySQL, Redis, Firebase FCM

- Built REST API for a two-sided mobile marketplace connecting local farmers with culinary SMEs to reduce food waste.
- Designed relational database schema and implemented AI-based smart matching system that recommends products based on buyer preferences and browsing history, with Redis caching for performance.
- Developed real-time order tracking, in-app chat with media support, and push notification system via Firebase FCM.
- Implemented interaction logging pipeline to feed personalized recommendation model over time.

Bantu.In | On-Demand Technician Booking App 2025
Project Manager & Full-Stack Developer | Flutter, Laravel 11, MySQL, OpenStreetMap

- Designed RDBMS, REST APIs and integrated geolocation and real-time booking features.

- Led a team of 3 using Design Sprint methodology, contributed ~70% of front-end code including interactive OpenStreetMap integration.

Jobaile | Household Worker Matching App

2025

Mobile Development | Flutter, Laravel 11, MySQL, REST API

- Led UI/UX design and front-end development of a two-sided platform connecting housemaids with employers using swipe-based matching.
- Conducted UX research (surveys, interviews, customer journey mapping) and produced Architecture Decision Records (ADR).
- Applied User-Centered Design (UCD) principles to create interfaces accessible across age groups.

TECHNICAL SKILLS

AI & Machine Learning

Python, TensorFlow, Keras, CNN, Computer Vision, Ultralytics (YOLO), Scikit-learn, Pandas

Back-end Development

Laravel 11 (PHP), Java Spring Boot, MySQL, RDBMS, MVC Architecture, API Development

Tools & Workflow

Git/Github, Jupyter Notebook, Google Colab, Design Sprint, Challenge-Based Learning

Mobile Development

Flutter (Dart), BLoC Architecture, REST API Integration, OpenStreetMap

Front-end & Design

HTML, CSS, Figma, UI/UX Design, User-Centered Design (UCD),

Soft Skills

Team Leadership, Time Management, Curiosity, Teamwork, Problem Solving

ORGANIZATIONAL EXPERIENCE

Event Member | Google Developer Groups on Campus Chapter UC Makassar

Sep 2025 - Present

- Designed event rundown and served as Master of Ceremonies (MC) for Google Developer Group on Campus chapter events.

Social Media Crew – @uc_makassar_imt (Instagram)

Mar 2025 - Mar 2026

- Produces content for the official Informatics department Instagram account as a freelance creator.

DevForge Hackathon Competition in Collaboration with Kasat Mata

Jan 2025 - Juni 2025

- Managed logistics and operational needs across divisions, including equipment, decoration materials, printed posters, and cuecards to ensure smooth event execution.

ACHIEVEMENTS

Speaker | 10th International Conference of Entrepreneurship

2023

Presented at an international academic conference as a student speaker.

Semifinalist | INJECTION by EPW @ ITS

2024

Reached the semifinal stage of a national competition hosted by Institut Teknologi Sepuluh Nopember (ITS).
